

JANARTHANAN B

Address: 7-32, Parumarathupatty, Oddanchatram, Dindigul, Tamil Nadu – 624704
Phone: +91 9095192575 | E-mail: jana86757@gmail.com | linkedin.com/in/janarthanan-b

CAREER OBJECTIVE

Aspiring Java Developer with a strong foundation in Core Java, OOP, Collections, Lambda Expressions, Stream API, Functional Interfaces, JDBC, Hibernate, Entity Mapping, and SQL. Eager to apply my technical skills in a challenging environment, contribute to software development projects, and continuously learn and grow as a software professional. Seeking an opportunity to work in a dynamic environment where I can apply my technical skills, support innovative projects, and continuously learn and grow while adding value to the organization.

EDUCATION

Bachelor of Engineering (B.E) – Government College of Engineering, Erode Oct 2020 – Jul 2024

Specialization: Automobile Engineering. CGPA: 7.65

Higher Secondary (10+2) – Sri Krishna MHS, Dindigul Jun 2018 – May 2020

Specialization: Mathematics, Physics, Chemistry, Biology

SSLC (10th) – Sri Krishna MHS School, Dindigul Jun 2016 – May 2018

Specialization: Mathematics, Science

SKILLS

Programming Languages: Java, HTML, CSS, JavaScript

Java Technologies: Core Java, OOPs, Collections Framework, Exception Handling, Lambda Expressions, Stream API, Functional Interfaces

Database Connectivity: JDBC, Hibernate (ORM), Entity Mapping (One-to-Many, Many-to-One), @JoinColumn Annotation

Frontend Frameworks: React.js (Hooks, Context API, Custom Hooks, Higher-Order Components), REST API Integration

Database: SQL, MySQL

Build Tools & Version Control: Maven, Git, GitHub

Microsoft Tools: Excel, PowerPoint, Word

PROJECTS

1. Student Management System using JDBC (DTO & DAO) Jan 2025 – Feb 2025

Developed a Student Management System using core JDBC, following the DTO (Data Transfer Object) and DAO (Data Access Object) design pattern to maintain clean separation between business logic and database operations. Implemented database connectivity using JDBC APIs to perform CRUD (Create, Read, Update, Delete) operations on student records with a relational database.

2. Student and Customer Management System using Hibernate (With and Without Maven) Feb 2025 – Mar 2025

Built a Student and Customer Management System using the Hibernate ORM framework, implemented both with and without Maven, following the DTO & DAO design process for database connectivity. In the Customer Management System, designed two related tables – Customer Details and Product Details – and connected them using One-to-Many and Many-to-One mapping, applying the @JoinColumn annotation to define the relationship between the two entities.

3. Ledger – React Product Catalog with Live API Integration Jul 2026

Built a React product catalog application integrating live data from a REST API (Fake Store API), with category filtering and search implemented over the fetched dataset. Implemented global cart state using the Context API and useReducer to avoid prop drilling, a custom hook (useProducts) to encapsulate data fetching and loading/error state, and a reusable Higher-Order Component (withLoading) to handle loading, error, and empty states across components. Designed a custom, non-templated visual identity using Vite and hand-written CSS rather than a UI framework.

4. Button Operated Gear Changing System at Erode, Tamil Nadu Nov 2023 – Dec 2023

Project Title: Button Operated Gear Changing System using Electro-magnetic Solenoid

- The Button Operated Gear Changing System simplifies and enhances gear shifting in vehicles.
- Traditional systems use mechanical linkages or hydraulic actuators, which can wear over time.
- This system integrates a button-operated mechanism with an electro-magnetic solenoid for smoother, more efficient gear changes.

INTERNSHIP / IN-PLANT TRAINING

Tamil Nadu State Transport Corporation at Dindigul, Tamil Nadu Jun 2023 – Jul 2023

- Evaluated the working condition of engine parts, contributing to efficient maintenance practices.
- Conducted FC checks to ensure compliance with regulatory standards.
- Reconditioned vehicle parts, focusing on enhancing their durability and functionality.

CERTIFICATIONS

- Test Automation
- Java Programming
- Excel Basics (Coursera)
- Top Gun - Electric Vehicle Security System Workshop (Anna University)

ACHIEVEMENTS

- Organized "The Agni" a college event by co-ordinating with alumni – 2023
